

# Peterson Service Company

Our goal is to help you save energy, reduce costs, and extend the lifespan of your equipment!

For commercial and industrial buildings, HVAC is a high priority and concern. It can be up to 40 percent of the utility cost.

At Peterson Service Company, we strive to understand the needs of our clients and provide them with the service they need.

## Our Services

### PREVENTIVE MAINTENANCE

Peterson specializes in planned service agreements for regularly scheduled maintenance and inspections that are customized to fit your budget and the unique requirements of your HVAC system. We ensure that your systems and equipment are running as efficiently as possible: fixing costs, extending lifespan of equipment, and identifying potential problems before costly breakdowns occur.

### INSTALL / RETROFIT

Buildings are always changing, so we analyze existing equipment and systems to determine how to make them work with your current building layout and utilization. We modify your existing equipment with additional or new components to achieve optimal comfort and productivity.

Outstanding Service Since 1981

## Our Services

### REPLACE / UPGRADE

Peterson helps customers plan for the replacement and upgrade of components on a proactive basis. We know what to look for and provide you with a plan that takes budget and facility requirements into account.

### CONTROLS

Peterson is a leading provider of programmable digital controls by Tridium/Niagara, Honeywell, and Johnson Controls. Combining our knowledge of legacy systems with the latest advances in automation, Peterson customers achieve higher efficiency building feedback and system performance that translates into lower energy and business operating cost.
